a fabric having two sides, said fabric formed of interwoven warp and weft yarns of polypropylene or polyethylene composition;

a coating of a thermoplastic polymer positioned on at least one of said sides of said fabric; and

a layer of cellulose material positioned on at least one of said sides of said fabric.

33. An antistatic fabric container as in Claim 32, wherein said layer of cellulose material is positioned on a same one of said sides of said fabric as said coating of thermoplastic polymer.

34. An antistatic fabric container as in Claim 32, wherein said layer of cellulose material is positioned on a different one of said sides of said fabric as said coating of thermoplastic polymer.

35. An antistatic fabric container as in Claim 32, wherein said coating of thermoplastic polymer is positioned on both of said sides of said fabric.

36. An antistatic fabric container as in Claim 32, wherein said layer of cellulose material is positioned on both of said sides of said fabric.

37. An antistatic fabric container as in Claim 32, wherein:

said interwoven warp and weft yarns are axially oriented, crystalline polypropylene having a composition containing from 0 to about 2% by weight, based on the weight of polypropylene, of a polyol ester of a C_{10} to C_{28} monocarboxylic acid antistatic agent; and

said coating of thermoplastic polymer having a composition of from about 1 to about to 15% by weight, of a polyol ester of a C_{10} to C_{28} monocarboxylic acid antistatic agent.

38. An antistatic fabric container as in Claim 32, wherein said layer of cellulose material is laminated to said at least one of said sides of said fabric.

39. An antistatic fabric container as in Claim 32, wherein said coating of thermoplastic polymer is adhered to said at least one of said sides of said fabric.--

REMARKS

A Petition for a Two-month Extension of Time is filed concurrently herewith. Claims 22-28 have been cancelled without prejudice and without disclaiming the subject matter thereof. Nonelected claims 1-21 and 29-31 remain in this application but
